PROFILE

Software Engineer with over 3.5+ years in React.js, and React Native development. Expert in leading projects across various domains, including social, FinTech, healthcare, and astrology. Successfully launched over 10 mobile and web applications focusing on high-quality, scalable, and user-centered solutions. Proficient in end-to-end project management and dedicated to continuous learning and staying current with emerging technologies.

PROFESSIONAL EXPERIENCE

Software Engineer

05/2022 - present

SAS Tech Studio Pvt. Ltd.

- UI development initiatives, ensuring seamless user experiences across FinTech, Healthcare, and Astrology domains.
- Successfully spearheaded the development and launch of 5+ React Native mobile applications and 5+ React web applications.
- Collaborate closely with cross-functional teams to design, develop, and implement innovative solutions.
- Mentor junior developers, fostering a culture of knowledge sharing and continuous improvement.

Junior Developer Trainee

04/2021 - 05/2022 | Nashik, India

Duende Ingenious LLP

- Developed reusable components for multi-platform applications, enhancing the efficiency and consistency of development efforts.
- Played a key role in building components from scratch, ensuring high-quality, modular, and scalable solutions.
- Contributed to the successful delivery of projects by collaborating with team members and stakeholders.

EDUCATION

Master's in Computer Applications

Y.C.M.O.U. Nashik (2022)

Bachelor's in Computer Science

C.M.C.S College, Nashik (2017)

SKILLS

ReactJS | React Native | TypeScript | JavaScript | React Hooks | Redux | Flux | DOM | Firebase | Firebase Cloud Messaging | GIT | HTML/CSS | MySQL

PROJECTS

Finncub: 🗆

A Lending solution for MFI's

- A FinTech solution designed to digitalize the lending process for MFIs, enhancing business operations in tier 3-4 villages through mobile and web applications.
- This project highlights my skill in UI development, my ability to leverage React effectively, and my commitment to creating user-centric solutions that meet business requirements.
- Successfully integrated external services like e-signatures, karza, and Razorpay like third-party services for enhanced functionality.

aigahealth: 🛮

A healthcare solution to help people in need

- Migrated the healthcare app from a vendor's codebase to React & React Native, taking ownership of its development and future maintenance.
- Performed a deep analysis and refactoring of the existing code to guarantee functionality, optimize performance, and ensure adherence to React best practices.
- Built the app with cross-platform capabilities, enabling seamless expansion to the web or other platforms down the line.

JaaneMann:

An app to find Peace, Power and Prosperity

- Designed and developed a well-being application named JaaneMann from scratch.
- This project allowed me to showcase my management skills and contribute to creating a comprehensive well-being solution along with client interaction and satisfaction.
- Developed the mobile app using React Native and Web using React, while utilizing Python and Node.js for the backend functionalities.

Inventory Management System (IMS)

Managing stock in HO and branch leave

- Led the development of an advanced inventory management system designed to efficiently manage and maintain inventory. This system allows users to smoothly add inventory, update inventory status, monitor PAN-India inventory count, track delivery status and more.
- Implemented a face detection model to enhance security and accuracy during the handover of items to customers, ensuring an efficient and secure transaction process.

Loan Tracking App

- Developed a native mobile application using React Native, enabling users to easily track their loan details, payment history, and due payments. The app provides easy access to customers to pay EMI payments easily.
- Integrated Razorpay payment gateway to enable secure and efficient EMI payments within the application, ensuring a seamless user experience and enhanced convenience for customers.

Human Resource Management System

- Developed an HRMS to automate employee records, leave management, client records, and project processes, eliminating manual errors and enhancing efficiency.
- Implemented features including employee record management, attendance tracking, performance evaluations, and training history.
- Integrated asset allocation modules for efficient tracking across departments.
